PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building and maintaining enterprise-grade Angular (TypeScript) single-page applications and customizing ERP systems. Proficient in developing high-performance, reusable UI components using Angular, TypeScript, HTML5, CSS Flexbox, and JavaScript with a focus on responsive/adaptive design, cross-browser compatibility, and accessibility (WCAG). Experienced in micro-frontend SPA architecture, MySQL database integration, unit testing with Jasmine, and collaborating in Agile Scrum environments with BA and UI/UX designers. Skilled in Gen AI (OpenAI/ChatGPT, Google Gemini) and Agentic AI (Codex, Google Antigravity, Google AI Studio) for accelerated development workflows.

CORE COMPETENCIES

Angular (TypeScript)

Micro-Frontend SPA Architecture

ERP Systems Customization

HTML5 & CSS Flexbox

Responsive & Adaptive Design

Reusable UI Components

NgRx State Management

Unit Testing (Jasmine)

Cross-Browser Compatibility

Accessibility (WCAG)

Gen AI & Agentic AI

Code Integration

TECHNICAL SKILLS

Frontend & SPA: Angular (TypeScript), JavaScript (ES6+), HTML5, CSS3/SCSS, CSS Flexbox, Bootstrap, Reusable UI Components

State & Architecture: NgRx Framework, Micro-Frontend SPA, Component-Based Architecture, Code Integration, ERP Module Customization

AI & Automation: Gen AI (OpenAI/ChatGPT, Google Gemini), Agentic AI (Codex, Google Antigravity, Google AI Studio)

Testing & QA: Jasmine, Unit Test Development, Test Documentation, Cross-Browser Testing, Performance Optimization

Backend & Database: Python, MySQL, ERP Scripting, REST API Integration

Tools & Workflows: Git, Azure DevOps (Familiar), Agile Scrum, Responsive/Adaptive Design, WCAG Accessibility

WORK EXPERIENCE

Dinnox IT Solution

2023 - Present

Frontend Developer

Cebu, Philippines

- Angular SPA Development:** Developed and maintained enterprise-grade Angular (TypeScript) web application interfaces, building high-performance frontend components that bridge backend business logic with responsive, user-facing UI across multiple ERP modules.
- Reusable Component Architecture:** Engineered modular, reusable UI component libraries using Angular and TypeScript, implementing component-based architecture patterns that reduced code duplication by 35% and streamlined feature development across ERP projects.
- ERP Customization & Scripting:** Tailored existing ERP modules to meet unique business requirements through technical customization and custom script development using JavaScript and Python, automating repetitive tasks and improving operational efficiency by 30%.
- Responsive & Adaptive Design:** Implemented pixel-perfect, mobile-first responsive layouts using HTML5 and CSS Flexbox, ensuring cross-browser compatibility across Chrome, Firefox, Safari, and Edge with WCAG accessibility compliance.
- Testing & Code Integration:** Developed unit test packages using Jasmine, executed test suites, and documented test results. Integrated frontend components into larger project contexts with Git version control and MySQL database connectivity.
- AI-Powered Development:** Leveraged Gen AI tools (OpenAI/ChatGPT, Google Gemini) and Agentic AI platforms (Codex, Google Antigravity) to accelerate Angular component scaffolding, code reviews, and performance optimization workflows.
- Agile Collaboration:** Participated in daily Agile Scrum standups, collaborated with BA and UI/UX designers to understand requirements, integration points, and user flows for enterprise application delivery.

KEY PROJECTS

Angular-Based ERP Web Application

Angular, TypeScript, MySQL

Developed and maintained enterprise web application interfaces using Angular (TypeScript). Built high-performance frontend components with reusable UI patterns that integrated seamlessly with MySQL backend services. Implemented NgRx state management for complex data flows across multi-module ERP architecture. Used **Google Gemini API** and **Codex** for accelerated component development and Jasmine unit test generation.

ERP Module Customization Platform

JavaScript, Python, CSS, Scripting

Tailored ERP solutions to meet unique business needs through technical customization of existing modules. Developed custom scripts using JavaScript and Python to automate repetitive business tasks, improving operational efficiency by 30%. Leveraged **OpenAI/ChatGPT** and **Google AI Studio** for rapid script prototyping and debugging.

EDUCATION

Bachelor of Science in Information Technology

Cebu Technological University - Ginatilan Extension Campus

Completed
